

MODERN QA FOR AI-GENERATED TRAINING CONTENT

FREE QUICK SCREEN

10-POINT AI TRAINING CONTENT QUICK CHECK

A fast human-review screen for AI-assisted learning content before release.

HOW TO USE

Check each item Yes / No. A No is a review signal, not an automatic failure. Resolve it, consciously accept it where appropriate, or escalate it before release.

Check	What to verify	Yes	No
1. Purpose & audience	The learner, purpose and intended outcome are explicit.	☐	☐
2. Objective quality	The learning objective describes what the learner should know, decide or do.	☐	☐
3. Activity alignment	Content and learning activities actually support the stated objective.	☐	☐
4. Assessment alignment	Questions or tasks measure the intended objective, not just easier recall.	☐	☐
5. Cognitive level	The level of practice and assessment is appropriate to the intended outcome.	☐	☐
6. Evidence & sources	Material factual claims are supported by reliable source material or flagged for verification.	☐	☐
7. Assessment integrity	Correct answers or success criteria are defensible; no obvious ambiguity, clues or contradictions remain.	☐	☐
8. Learner experience	Language, structure, redundancy and duration are realistic for the intended learner.	☐	☐
9. Human review	Required SME / instructional / assessment review has been completed for the risk level.	☐	☐
10. Release ownership	A named human is accountable for the exact version being released.	☐	☐

0-6 YES HOLD & REWORK	7-8 YES REVISE & RE-CHECK	9-10 YES NO IMMEDIATE RED FLAGS
--------------------------	------------------------------	------------------------------------

Critical quick-screen rule: a No on evidence/source integrity, assessment integrity or release ownership should normally trigger HOLD until the issue is resolved or appropriately escalated.

Need a deeper review? The full Qualidact AI Training Content Quality Control System adds 50 scored controls, alignment and cognitive-demand analysis, assessment QA, evidence verification and documented release recommendations.
